

## PRESS RELEASE

The most beautiful woods from all around the world. Made in Austria.

**Historic wooden beams from the Alps, giant sequoias from the US or painted wooden boats from Asia: SUN WOOD's vision is to make unique woods from all around the world accessible for creative room solutions.**

Hundreds of reclaimed and precious woods found their way to the SUN WOOD factory where they're reproduced on local wood in a resource-conscious and authentic way thanks to an innovative printing and surface technology. The 3D large format scanner digitizes original woods and then refines a variety of different substrates to emulate their look and feel. All SUN WOOD products are made of a PEFC certified wood base from local forestry whose surface is chopped and brushed by hand. The desired decor is then applied sustainably and directly to the wood using innovative printing technology.

### **A distinct advantage over reclaimed or precious wood**

Cut down the rainforest in exchange for a precious wood table? What about chemical processing of reclaimed wood to ward off pests and make it last longer? At SUN WOOD, you don't have to choose! All products have wood bases made of new, local & sustainable forestry that are authentically modeled after real reclaimed or precious wood. When it comes to look and feel, SUN WOOD products are practically identical to their originals.

### **Over 100 decors on a variety of supporting materials**

Using innovative printing and surface technology, SUN WOOD refines a great variety of supporting materials and formats with over 100 different wood decors. This includes wood panels and tabletops plus a myriad of boards, veneers, beams or even doors. We can make wood beams up to 15 meters in length, 6 x 2 meter panels or individual special formats without breaking a sweat. The long-term availability of all products and decors is guaranteed.

SUN WOOD is a brand of the family owned company STAINER Schriften und Siebdruck GmbH & Co KG based in St. Martin, Austria. As a full-service provider in the printing sector, the company boasts a technical edge in the field of screen printing and digital printing after almost 50 years in business and sets the gold standard with its SUN WOOD and Print Tattoo divisions.
